

Project Start

Technical Recruitment Specialist

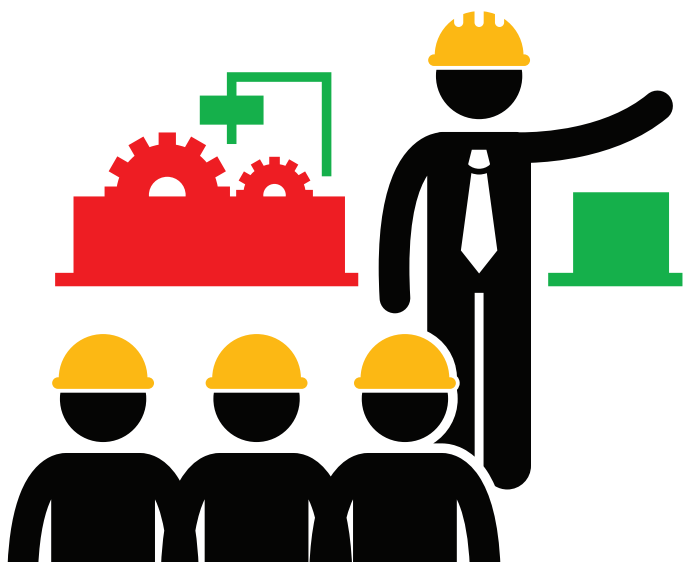

Project Start has a 20-year history of recruiting for a wide range of industrial skillsets.

Industrial recruitment can be one of the most diverse areas to recruit within and we have spent many years fine tuning our understanding of the different roles and industrial environments.

We are very comfortable with supporting our clients and the lower level and senior needs within Automotive, Agriculture, and Chemical, Distribution, FMCG, Pharmaceutical, Production, Manufacturing and Timber.

Looking for qualified candidates in some of the most challenging markets is what we are best at, here are a list of some of the skillset areas that we can supply temporary and permanent candidates for, but not limited to: -

- **Operatives and Machinists**
- **Welding & Fabrication**
- **Maintenance (Install & Service)**
- **Project Management**
- **Quality & HSE**
- **Senior Management**

Industrial

If you are replacing a skills gap, expanding the team or starting a new project, then please consider Project Start! Our consultants are qualified, experienced, knowledgeable and have a high degree of technical understanding when it comes to finding you the construction staff you are seeking.

Whether this is for a short-term contract, temp to perm arrangement whilst you trial the candidate and skill set or a long term prospective, Project Start will guarantee to find you the best candidates through a number of successful attraction & resourcing methods.

Call Project Start Recruitment Solutions on 01454 529009 for a chat about your current requirements and how we can support you through the build you need to recruit for.
